

### 1. Language Fundamentals:

1.1. Introduction 1.2. History 1.3. Installation and Setup 1.4. HelloWorld Example 1.5. Features of Python	1.6. Identifiers 1.7. Keywords (Reserved Words) 1.8. Fundamental Data types 1.9. Immutability 1.10. Type Casting	1.11. Escape Characters 1.12. Comments, Indentation 1.13. list, tuple, set, frozenset, dict 1.14. bytes, bytearray 1.15. range, None
--	--	--

### 2. Operators

2.1. Arithmetic Operator 2.2. Relational Operator 2.3. Comparison Operator 2.4. Equality Operator	2.5. Logical Operator 2.6. Bitwise Operator 2.7. Shift Operator 2.8. Assignment Operator	2.9. Ternary Operator 2.10. Membership Operator 2.11. Operator Precedence
--	---	---

### 3. Input Output Statements

3.1. Reading data from keyboard 3.2. Command line arguments	3.3. Print, sep, end 3.4. format	3.5. Replacement operator 3.6. Print with formatted String
--	-------------------------------------	---

### 4. Flow Control

Selection Statements: 4.1.1. If, If-else 4.1.2. If-elif 4.1.3. If-elif-else	Iterative Statements: 4.2.1. for 4.2.2. while	Transfer Statements: 4.3.1. break 4.3.2. continue Pass, del
--	---	--

### 5. String Manipulation

5.1. Slice 5.2. reversed	5.3. String traversing 5.4. count	5.5. Multi line String 5.6. String functions
-----------------------------	--------------------------------------	---

### 6. Functions

6.1. Define a function 6.2. Function Call 6.3. Global Variables	6.4. Lambda functions 6.5. Varargs	6.6. Math functions 6.7. Date time functions
---	---------------------------------------	---

### 7. Exception Handling

7.1. Errors and Exceptions 7.2. Exception Handling Mechanism 7.3. Try-except	7.4. Try with multi except 7.5. Try- except -finally 7.6. Print exception object	7.7. Raise user defined exception 7.8. Catch user defined exception
--	--	--

### 8. File Handling

8.1. Modes of file in Python 8.2. Create a file	8.3. Read contents from a file 8.4. Edit to a file	8.5. File deletion
--	---	--------------------

### 9. Python Modules

10.1. Creating a module 10.2. Using a module	10.3. Variables in a module 10.4. Naming a module	10.5. Built in modules 10.6. Import from module 10.7. PIP
---	--	---

### 10. Python MySQL Connectivity

11.1. MySQL Basics 11.2. MySQL installation and Setup	11.3. Basic Operations in MySQL 11.4. MySQL Driver Setup in Python	11.5. CRUD Operation in Python
--	---	--------------------------------
